## Schroder International Selection Fund Global Target Return

A Accumulation USD | Data as at 30.06.2023

### Important Information

The fund invests directly and indirectly (through open-ended investment fund and derivatives) in equities and equities related securities, fixed and floating rate securities and other asset classes worldwide.

•The fund's investment in equity is subject to equity investment risk.

•The fund may invest in other investment funds which have liquidity risk and additional cost involved. There is no guarantee that the investment objective and strategy can be successfully achieved.

•The fund invests in debt securities which may be subject to credit and counterparty risk, interest rate risks and credit ratings risk, etc. .

•Investment in sovereign debt obligations which may expose the fund to political, social and economic risks. The fund may suffer significant losses upon defaults by government entities.

•The fund may use derivatives to meet its specific investment objective. Derivative exposures may involve credit risk and counterparty risk, liquidity risk, valuation risk, volatility risk, over-the-counter transaction risks and hedging risk. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.

•For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

### Investment Objectives

The Fund aims to provide capital growth and income of ICE BofA 3 Month US Treasury Bill index plus 5% per annum before fees have been deducted over rolling three year periods by investing in a broad range of asset classes worldwide. There is no guarantee that the objective will be attained and your capital is at risk.

## Schroder International Selection Fund Global Target Return

A Accumulation USD | Data as at 30.06.2023

### Benchmark and corporate action information

---

The target benchmark in the investment objective has been changed from 3-month USD LIBOR +5% to ICE BofA 3 Month US Treasury Bill Index +5% on 30.07.2021. The full track record of the previous benchmark has been replaced with the new one. The full track record of the previous index has been kept and chain linked to the new one. The fund's performance should be assessed against its target benchmark, being to achieve a return of ICE BofA 3 Month US Treasury Bill index plus 5% before fees have been deducted. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because the target return of the fund is to deliver or exceed the return of that benchmark as stated in the investment objective. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR).

### Important information
