IMPORTANT: This letter is important and requires your immediate attention. If you have any questions about the content of this letter, you should seek independent professional advice. Schroder Investment Management (Europe) S.A., as the Management Company to Schroder International Selection Fund, accepts full responsibility for the accuracy of the information contained in this letter and confirms, having made all reasonable enquiries, that to the best of its knowledge and belief there are no other facts the omission of which would make any statement misleading.

18 August 2023

Dear Shareholder,

Schroder International Selection Fund (the "Company") – Transfer of investor data, changes to subscription, redemption and switching procedures and other changes

Transfer of investor data

We are writing to inform you that the Company's prospectus has been updated to state that investor data (such as name and address) may be transferred by or on behalf of Schroder Investment Management (Europe) S.A. to certain third party service providers, such as paying agents or facilities agents, in the EEA, Switzerland, the UK and Hong Kong.

For further information on the transfer of your personal data please refer to our privacy policy (available at www.schroders.com/en/privacy-policy¹).

Changes to subscription, redemption and switching procedures and other changes

Please note that instructions for subscription, redemption and switching of shares in the sub-funds of the Company (the "**Sub-Funds**") can also be submitted by post or by fax to the Company's transfer agent's delegate, The Hongkong and Shanghai Banking Corporation Limited (the "**Delegate**"). The Hong Kong Representative, Schroder Investment Management (Hong Kong) Limited, will continue to receive applications for subscription, redemption and switching of shares in the Sub-Funds by post, but applications by fax should be made to the Delegate only.

The transfer of shares may also be effected by delivery to the Delegate of a duly signed transfer form in appropriate form.

The Hong Kong offering documents of the Company will be revised to reflect the changes as set out above and will be available free of charge at www.schroders.com.hk² or upon request from

* The ongoing charges figure is based on the expenses for the year ended 31 December 2022. This figure may vary from year to year.

What is this product?

This is a sub-fund of Schroder International Selection Fund, a mutual fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and investment strategy

Investment Objective

The fund aims to provide capital growth in excess of the FTSE Hong Kong (Net TR) index after fees have been deducted over a three to five year period^{Note} by investing in equity and equity related securities of companies listed on the Hong Kong Stock Exchange.

^{Note} For clarification purpose, this means to exceed a medium to long term return of the stated index after fees have been deducted. The three to five year period is considered as a medium to long term period, and is the period over which an investor should assess the fund's performance.

Investment Policy

The fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies listed on the Hong Kong Stock Exchange.

The fund may invest directly in China B-Shares and China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Stock Connect (as defined below) and shares listed on the Science and Technology Innovation Board of the Shanghai Stock Exchange ("STAR Board") and the ChiNext market of the Shenzhen Stock Exchange ("ChiNext market").

The fund is not subject to any limitation on the market capitalisation of the companies that it may invest in.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in Appendix I of the Prospectus).

The fund may invest directly in China A-Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect (collectively "Stock Connect") (as further described in the section headed "Stock Connect" in the Hong Kong Covering Document). Indirect exposure to China A-Shares may also be sought for the fund through investment in financial instruments such as China market access products and other funds with China access through Qualified Foreign Investor ("QFI") status. The fund does not currently intend to invest 30% or more of the net asset value of the fund directly and indirectly in China A-Shares and China B-Shares.

Under exceptional circumstances (e.g. market crash or major crisis), the fund may be invested temporarily up to 100% of its net asset value in liquid assets such as bank deposits, certificates of deposit, commercial paper and treasury bills for cash flow management.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently. Derivatives can be used for instance to create market exposures through equity, currency, volatility or index related financial derivative instruments and include over-the-counter and/or exchange traded options, futures, contracts for difference, warrants, swaps, forward contracts and/or a combination of the above.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the FTSE Hong Kong (Net TR) index ("Target Benchmark") and compared against the Morningstar Hong Kong Equity Category ("Comparator Benchmark"). The fund's investment universe is expected to overlap to a limited extent with the components of the Target Benchmark. The Comparator Benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets.

Use of derivatives / investment in derivatives

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

What are the key risks?

Investment involves risk. Please refer to the offering document for details including the risk factors.

1. Equity investment risk

Investment in equity securities is subject to the risk that the market value of the stocks may go down as well as up due to numerous factors such as changes in investment sentiment, political environment, economic environment, issuer-specific factors, regional or global economic instability, currency and interest rate fluctuations. If the market value of the stocks go down the net asset value of the fund may be adversely affected.

2. Concentrated geographical locations

The fund investing in concentrated geographical locations may be subject to a higher level of risks comparing to a fund investing in a more diversified portfolio/strategy. The value of the fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant geographical locations.

3. Risks related to investment in the People's Republic of China (the "PRC")

Investing in the securities market in the PRC is subject to the risks specific to the PRC market including change in political, social or economic policy risk, liquidity and volatility risk, currency and exchange risk.

- **Change in political, social or economic policy risk**— The investment will be sensitive to any significant change in political, social or economic policy in the PRC which may adversely affect the capital growth and thus the fund performance.
- **Legal and regulatory risk**— The regulatory and legal framework for capital markets and joint stock companies in the PRC may not be as well developed as those of developed countries. PRC companies are required to follow the PRC accounting standards and practice which may deviate significantly from international accounting standards. The settlement and clearing systems of the Chinese securities markets may not be well tested and may be subject to increased risks of error or inefficiency. Securities exchanges in the PRC typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the fund.
- **Liquidity and volatility risk**— Compared with the choice available in other markets, there is a low level of liquidity in the A-Shares and B-Shares of the PRC markets. This could potentially lead to severe price volatility.
- **Currency and exchange risk**— The PRC government's control of currency conversion and exchange rates may adversely affect the operations and financial results of the companies invested in by the fund.
- **PRC taxation consideration**— The fund investing in securities issued by companies resident in the PRC are subject to dividend withholding tax but are not currently subject to capital gains tax in the PRC. The tax laws, regulations and practice in the PRC are inherently uncertain and liable to change without prior notice. They may also be changed with retrospective effect. The fund does not currently make any provision for Chinese capital gains tax. If appropriate, a provision may be introduced for the fund to cover capital gains tax, withholding taxes or other taxes. Consequently, investors may be advantaged or disadvantaged depending upon the final rules.

4. Risks related to investments via the Stock Connect

The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the programme is effected, the fund's ability to invest in China A-shares or access the PRC market through the programme will be adversely affected. In such event, the fund's ability to achieve its investment objective could be negatively affected.

5. Risks relating to ChiNext market and/or STAR Board

- **Higher fluctuation on stock prices and liquidity risk** – Listed companies on ChiNext market and/or STAR Board are usually of emerging nature with smaller operating scale. Listed companies on ChiNext market and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board.
- **Over-valuation risk** – Stocks listed on ChiNext market and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- **Differences in regulation** – The rules and regulations regarding companies listed on the ChiNext market and STAR Board are less stringent in terms of profitability and share capital than those in the main boards.
- **Delisting risk** – It may be more common and faster for companies listed on ChiNext market and/or STAR Board to delist. ChiNext market and STAR Board have stricter criteria for delisting compared to the main boards. This may have an adverse impact on the fund if the companies that it invests in are delisted.
- **Concentration risk** – STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the fund to higher concentration risk.

Investments in the ChiNext market and/or STAR Board may result in significant losses for the fund and its investor.

6. Risks related to investments in China market access products

The fund may use China market access products (e.g. participatory notes) to gain exposure to China A-Shares indirectly. This involves additional risks including lack of a secondary market in such instruments, illiquidity of the underlying securities, difficulty in selling these instruments at times when the underlying markets are closed and counterparty default risk.

7. Risks related to investments in other funds with China access

- Investing in other funds may result in additional operating fees and expenses from the underlying funds.
- The fund may invest in other funds with China access through QFI status. Therefore, the fund is indirectly exposed to the risks associated with the QFI regime such as suspension or revocation of the QFI status, as well as repatriation and liquidity risks.

8. Derivatives

The fund may use derivatives to meet its specific investment objective. There is no guarantee that the performance of derivatives will result in a positive effect for the fund. Derivative exposure may lead to a high risk of significant capital loss. Risks associated with derivatives include credit risk and counterparty risk, liquidity risk, valuation risk, volatility risk, over-the-counter transaction risks and hedging risk. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the fund. There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.

9. Smaller companies risk

Fund invests in smaller companies may fluctuate in value more than other funds and may be more vulnerable to adverse developments than those in larger companies. During periods where markets are

falling, securities of smaller companies may become less liquid and experience short-term price volatility and wide spreads between dealing prices.

10. Risks relating to distributions

- For distribution share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital; capital growth will be reduced and in periods of low growth capital erosion may occur.
- Distribution share classes with a fixed dividend policy will distribute the dividends based on a fixed amount or fixed percentage of the net asset value per share. This may result in share classes with fixed distributions either paying out both income and capital in distribution payments, or not substantially distributing all the investment income which a share class has earned.
- **You should note that in the circumstances where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share.**

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the fund's Class A HKD Accumulation increased or decreased in value during the calendar year being shown. Performance data has been calculated in HKD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Target Benchmark: FTSE Hong Kong (Net TR) index
- Comparator Benchmark: Morningstar Hong Kong Equity Category
- Fund launch date: 2002
- Class A HKD Accumulation launch date: 2002
- The management company views the Class A HKD Accumulation, being the retail share class denominated in the base currency of the fund, as the most appropriate representative share class of the fund.

Note: The performance of these years was achieved under circumstances that no longer apply. During these years, there were material changes to the fund, namely, changes of investment objective and policy and reduction of fee(s).

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?**Charges which may be payable by you**

You may have to pay the following fees when dealing in the shares of the fund.

Fee	What you pay		
Share class	A	A1	D
Subscription fee (Initial charge)	Up to 5.00% of the total subscription amount	Up to 4.00% of the total subscription amount	Nil
Switching fee (Switching charge)	Up to 1.00% of the value of the shares to be switched		
Redemption fee (Redemption charge)	Nil		

Ongoing fees payable by the fund

The following expenses will be paid out of the fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the fund's value)		
Share class	A	A1	D
Management fee (Annual Management Charge)	1.50%		
Depositary fee	Up to 0.005%		
Performance fee	Nil		
Administration fee	Up to 0.25%		
Distribution charge (Annual Distribution Charge)	Nil	0.50%	1.00%
Custody safekeeping fee	Up to 0.3%		
Transaction fees (charged by the Depositary)	Up to USD75 per transaction		
Fund accounting and valuation fees	Up to 0.0083%		

Other fees

You may have to pay other fees when dealing in the shares of the fund. Please refer to the offering document for fees payable by the fund.

Additional information

- You generally buy and redeem shares at the fund's relevant net asset value ("NAV") after Schroder Investment Management (Hong Kong) Limited receives your request, directly or via a distributor, in good order at or before 5pm HK time, being the fund's dealing cut-off time on each dealing day of the fund. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- A dividend calendar including details on the distribution frequency and the dividend calculation basis for all available distribution share classes and a composition of the dividend payments (i.e. the percentages of distribution being paid out of capital and net distributable income) for the last twelve months for each of these distribution share classes (i) with a variable distribution policy or (ii) with a fixed dividend policy and paying dividends out of capital are also available from the Schroder Investment Management (Hong Kong) Limited on request and from the Schroders' Internet site (www.schroders.com.hk). This website has not been reviewed by the SFC.
- Past performance information of other share classes offered to Hong Kong investors is available online at www.schroders.com.hk. This website has not been reviewed by the SFC.
- The net asset value of this fund is calculated and the price of shares is published on each dealing day. They are available online at www.schroders.com.hk. This website has not been reviewed by the SFC.
