### COMPOSITION

### INVESTMENT OBJECTIVES AND POLICIES

The BOCHK US Dollar Money Market Fund seeks to provide an investment vehicle to enjoy the higher rates available from a managed portfolio of short-term and high quality money market investments combined with a high degree of security and ready availability of monies and to seek to offer returns in line with money market rates. At least 70% of the Sub-Fund's net asset value will be invested in a range of short-term deposits and high quality money market instruments issued locally or overseas by governments, quasi-governments, international organisations, financial institutions or other corporations and money market funds that are authorized by the SFC under 8.2 of the Code on Unit Trusts and Mutual Funds or regulated in other jurisdiction(s) in a manner generally comparable with the requirements of the SFC and acceptable to the SFC. The Sub-Fund will maintain a portfolio with weighted average maturity not exceeding 60 days and a weighted average life not exceeding 120 days and will not purchase an instrument with a remaining maturity of more than 397 days, or two years in the case of Government and other public securities. The Sub-Fund may invest not more than 30% of its Net Asset Value in debt instruments with loss-absorption features (LAP).

### MANAGER'S COMMENT<sup>##</sup>

- U.S. Treasury bond market posted losses in May. Yields generally rose, amid positive developments over the debt ceiling negotiation, reducing risk of a debt default. Adding to it was CPI data that suggested a sticky inflationary dynamic, although growth indicators continued to send mixed signals, with ISM manufacturing index remaining weak in April, while the services print stayed robust.
- Futures market has now priced in a significant chance for a 25-basis-point hike to come by July, with rate-cuts to come in the latter part of the year. Yield on the 2-year benchmark U.S. Treasury bond rose by 40 basis points to 4.40%.
- The Sub-Fund would maintain high degree of liquidity and add quality short-dated paper in a way to enhance return.

The value of the investment products managed by BOCI-Prudential Asset Management Limited represents 0.0% of the Sub-Fund's fund size.

Class B of the Sub-Fund has been closed for subscription.

<sup>^</sup> From 1 January 2023, the "3-Month London Interbank Offered Rate" (3M LIBOR) used for performance comparison of the Sub-Fund has been replaced by "Secured Overnight Financing Rate Index" (SOFR Index). The SOFR Index value reflects the effect of compounding the SOFR each U.S. government securities market business day and allows the calculation of compounded SOFR averages over specific time periods. Such performance comparison information is for reference purposes only.

<sup>§</sup> "Net Liquidity" was formerly named as "Cash & Deposit".
