### MANAGER'S COMMENT\*\*

#### On Market

The details of phase one trade deal between China and US were in line with market expectations. The pent-up investment demand could, in our view, revive against this backdrop. The Coronavirus will weigh on China's growth in the near term; lower demand and tourist arrivals from China will likely drag US GDP growth too. Nonetheless, its impact on growth could probably be short-lived if the 2003 SARS outbreak is of any guide. Britain's parliament approved a divorce settlement with the European Union, which includes a business-as-usual transition deal covering the period after "Brexit" Day on 31 January until end of December. In the near term, development of the Coronavirus outbreak would be the focus.

Global equities dropped in January. US stocks advanced to record high after the preliminary trade deal was signed off and companies' quarterly earnings beat investors' estimates. Concerns over the latest Coronavirus outbreak would likely reduce risk appetites. Stocks might continue to falter until the public health threat de-escalates. In the face of a heightened uncertainty, market volatility would prevail as investors shift focus to corporate earnings and fiscal support to look for a more sustainable growth driver.

#### On Portfolio

The Sub-Fund recorded a negative return and underperformed the reference index in January. Stock selections in Health Care & Pharmaceutical names dragged the most. However, with reference to previous epidemics like SARS and Ebola, impact to stock market would be temporary. Thus the Sub-Fund would adopt a more neutral stance to reduce the near term risks.

The value of the investment products managed by BOCI-Prudential Asset Management Limited represents 8.4% of the Sub-Fund's fund size.
