MANAGER'S COMMENT^{##}

On Market

US China trade war has been escalating during the month: higher and/or new tariffs were announced before the next round of trade talk. Italy's Prime Minister resigned then dramatically returned as Prime Minister to form a new government but to exclude hardline leader Matteo Salvini from power. UK economy remained mixed and uncertainty over "Brexit" continued to dampen business confidence. Japan's second quarter GDP surprised on the upside, marking a third quarter of expansion while macro data painted a picture of lackluster growth in the Asia economy. Going forward, the possibility for more interest rate cuts this year is higher than before.

Global equity market fell in August, with Japan performing the best in USD term. Sino US trade dispute heated up again after the US imposed tariffs on the remaining Chinese exports to the US. UK equity market dropped last month as trade tensions and uncertainty over "Brexit" weighed on investors' confidence. Concerns of further escalation in US-China trade friction resurfaced again. Energy related names underperformed the most while conservative sector such as Utilities outperformed.

On Portfolio

The Sub-Fund underperformed the reference index MSCI AC World Daily TR Net USD in August. Property names were the major drag. Moving ahead, global equities would likely remain volatile amid the unstable backdrop. Trade dispute and geopolitical development would continue to drive equity market movement.

The value of the investment products managed by BOCI-Prudential Asset Management Limited represents 8.5% of the Sub-Fund's fund size.
