

BOCHK INVESTMENT FUNDS

BOCHK CHINA GOLDEN DRAGON FUND

February 2020 Issue
(Data as of 31 January 2020)

Important Notes:

- Investment involves risks and the BOCHK China Golden Dragon Fund (the "Sub-Fund") may not be suitable for everyone. Past performance is not indicative of future performance. The Sub-Fund is subject to market and exchange rate fluctuations and to the risks inherent in all investments. Price of Units and the income (if any) generated from the Sub-Fund may go down as well as up. Investors could face no returns and/or suffer significant loss related to the investments. There is no guarantee in respect of repayment of principal.
- The key risks to which the Sub-Fund is subject to include: general investment risk, foreign exchange and RMB currency and conversion risk, single country and concentration risk, emerging market/ the People's Republic of China ("PRC") market risk, equity market risk, risk associated with high volatility of the equity market in Mainland China, risk associated with regulatory/ exchanges requirements/policies of the equity market in Mainland China, risks associated with Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively, "Shanghai and Shenzhen Connect"), risk of investing in ELLs, risks relating to investment in ETFs, PRC tax risk, derivative instruments risk and potential conflicts of interest.
- Investing in emerging markets, such as the PRC may involve increased risks and special considerations not typically associated with investment in more developed markets.
- The relevant rules and regulations on Shanghai and Shenzhen Connect are subject to change which may have potential retrospective effect. Each of Shanghai and Shenzhen Connect is subject to a set of Daily Quota, which does not belong to the Sub-Fund and can only be utilized on a first-come-first serve basis. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in A shares or access the PRC market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.
- As the Sub-Fund may invest in A shares indirectly through ELLs, the Sub-Fund is exposed to the risks relating to investment in ELLs:
 - Credit risk: If any one of the ELLs issuers fails to perform its obligations under the ELLs, the Sub-Fund may suffer losses potentially equal to the full value of the instrument issued by the relevant issuer. Any such loss would result in the reduction in the Net Asset Value of the Sub-Fund and impair the ability of the Sub-Fund to achieve its investment objective.
 - Illiquidity risk: There may not be an active market for those ELLs which are not listed or quoted on a market. Even if the ELLs are quoted, there is no assurance that there will be an active market for them. Therefore investment in ELLs can be highly illiquid.
 - QFII risk: The issuance of the ELLs depends on the ability of the QFII to buy and sell A shares. The availability of QFII investment quota and any restrictions or any change in the QFII laws and regulations may adversely affect the issuance of ELLs and impair the ability of the Sub-Fund to achieve its investment objective.
- The Sub-Fund is subject to PRC tax risk. There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realised via Shanghai and Shenzhen Connect or ELLs on the Sub-Fund's investments in the PRC. Any future changes in the taxation policies in respect of QFII's or the Sub-Fund's investment in A shares in the PRC will impact on the Sub-Fund's returns. It is possible that any future announcement by the PRC tax authority may subject the Sub-Fund to unforeseen tax obligations, which may have retrospective effect.
- Please refer to the offering document of the Sub-Fund for further details including investment objectives and policies, charges and expenses, and risk factors (especially for the parts relating to Shanghai and Shenzhen Stock Connect, ELLs and QFII), before making any investment decision.

The value of the investment products managed by BOCI-Prudential Asset Management Limited represents 0.8% of the Sub-Fund's fund size.

* Data Source – © 2020 Morningstar, Inc. All Rights Reserved.

** With effect from 17 December 2018, sector classification methodology for the Sub-Fund has been updated slightly. Accordingly, the sector allocation has been restructured and the sector named "Telecom" has been replaced by "Communication Services".

*** The manager's comment above solely reflects the opinion, view and interpretation of the fund managers as of the date of issuance of this document. Investors should not solely rely on such information to make any investment decision.

• Risk levels are categorized into low, low to medium, medium, medium to high and high. The risk levels are determined by BOCI-Prudential Asset Management Limited based on the investment mix of each Sub-Fund and/or its underlying investments, and represent only the views of BOCI-Prudential Asset Management Limited in respect of the relevant Sub-Fund. Such risk levels are for reference only and should not be regarded as investment advice. You should not rely on the risk levels only when making any investment decision. The risk level is determined based on data as at 31 December 2019 and will be reviewed and (if appropriate) updated at least annually without prior notice, taking into account the prevailing market circumstances. If you are in doubt about the information of risk level, you should seek independent financial and professional advice.

†† 12 Months Highest / Lowest NAV per Unit was calculated by reference to the NAV per Unit on each month's last dealing day.

▲ For switching into a different class (denominated in a different currency) of Class A Units relating to the same Sub-Fund or switching into Class A Units of another Sub-Fund which is not a Money Market Sub-Fund.

** For switching into Units of a Money Market Sub-Fund.

Investors should note that Bank of China (Hong Kong) Limited is not the Manager of the Sub-Fund and will only act as the Sponsor and Distributor whilst BOCI-Prudential Asset Management Limited is the Manager. Fund performance is calculated in the base currency of the Sub-Fund or the denominated currency of the relevant class of Units of the Sub-Fund on NAV-to-NAV basis with gross distribution reinvested. The data for "Standard Deviation", "Beta" and "Morningstar Overall Rating***" will not be shown for the Sub-Fund or the relevant class of Units of the Sub-Fund with less than 3-year history. "Standard Deviation", a risk measurement, is based on the monthly return of the Sub-Fund or the relevant class of Units of the Sub-Fund over the past 3 years in the base currency of the Sub-Fund or the denominated currency of the relevant class of Units of the Sub-Fund. "Beta" measures the sensitivity of the return of the Sub-Fund or the relevant class of Units of the Sub-Fund to the changes in its reference index. This document is issued by BOCI-Prudential Asset Management Limited and has not been reviewed by the SFC.

Fund Manager & Factsheets Issuer: BOCI-Prudential Asset Management Limited

INVESTMENT OBJECTIVES AND POLICIES

The BOCHK China Golden Dragon Fund seeks to provide investors with capital growth by investing in securities issued by or linked to companies which are related to the economy of the PRC. The Sub-Fund may invest in A shares (i) directly through Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect; and/or (ii) indirectly through investment in equity linked instruments ("ELIs") (which may take the form of notes, contracts or other structures) issued by institutions or their affiliates with qualified foreign institutional investors ("QFII") status in the PRC, exchange traded funds ("ETFs") listed on the Stock Exchange of Hong Kong Limited ("SEHK") (including ETFs managed by the Manager) and/or SFC authorised collective investment schemes ("CISs") (including CISs managed by the Manager), Hong Kong-listed stocks, H shares and/or shares of red-chip companies (directly and/or indirectly through investments in SFC authorised CISs (including CISs managed by the Manager) and/or ETFs (including ETFs managed by the Manager) listed on the SEHK. The Sub-Fund may also invest in B shares listed on the stock exchanges in Mainland China. The Manager intends that the aggregate investment made by the Sub-Fund in the A shares market through Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect, ELLs, ETFs and/or SFC authorised CISs will not exceed 60% of the Sub-Fund's Net Asset Value. The Sub-Fund's exposure to B shares market will not exceed 15% of its Net Asset Value. The Sub-Fund may also invest in other PRC related securities listed or quoted outside Mainland China and Hong Kong if such securities are issued by companies which are related to the economy of the PRC. These securities may be listed on various stock exchanges in New York, London or Singapore, such as ADRs (American depository receipts) and GDRs (global depository receipts).

MANAGER'S COMMENT**

On Market

China's fourth quarter GDP growth met expectation of 6.0%, remained at the same level of last quarter. December data also suggested that the economy showed resilience. Manufacturing PMI stayed above 50 for two consecutive months. Export and import growth surged to 7.6% and 16.3% from -1.3% and 0.5% in November respectively. In January, The PBoC cut RRR by 50bps and injected RMB300 billion to the banking system via MLF. These measures aimed to meet the large demand of money ahead of the Lunar New Year holidays and to shore up the economy. However, because of the outbreak of Wuhan Coronavirus, the recovering cycle could be substantially affected. The progress of containing the epidemic has now become the key factor affecting the economy.

Although the rally of mainland equities were largely unwavering after the unexpected escalation of geopolitical tension in Middle East in early January, the virus outbreak in Wuhan overshadowed mainland market throughout the rest of the month. China macro data released in January, especially the Exports and Industrial Production figures, showed stabilizing and improving signs but the unprecedented lock down of Wuhan City on 23 Jan 2020 subsequently derailed the rally. Large-cap dominant indices like Shanghai Composite Index and CSI300 erased their gain in January and sank about 2% respectively just before the one-week Lunar New Year market closure. Hang Seng H-share and Red-chip Index basically mirrored the pattern of their mainland peers in January, except for registering about 8-9% decline by the month-end, as more negative market impact of the outbreak was reflected in the Hong Kong market due to its earlier trading resumption on January 29.

On Portfolio

The Sub-Fund fell in January. Our positions in Consumer Discretionary (Consumption related) dragged the most to our performance. Our stock selection focus has moved to growth sectors in China "A" shares, and we increased holdings in precious metal equities in China stock universe.

SECTOR ALLOCATION**

COMPOSITION

* "Net Liquidity" was formerly named as "Cash & Deposit".

* The Sub-Fund may invest in A Shares (through investments in equity linked instruments ("ELIs") issued by institutions with the qualified foreign institutional investors ("QFII") status in the PRC. Please refer to the Explanatory Memorandum for further details of the Sub-Fund and pay particular attention to the "Risk Factors" section, especially for the part of "ELIs" and "QFII", before making any investment decision.
