

Product Key Facts
Franklin Templeton Investment Funds –
Franklin Mutual European Fund

Last updated: April 2019

- **This statement provides you with key information about this product.**
- **This statement is a part of the offering document.**
- **You should not invest in this product based on this statement alone.**

Quick facts

Management company: Franklin Templeton International Services S.à r.l.

Investment manager: Franklin Mutual Advisers, LLC., United States of America (internal delegation)

Depository: J.P. Morgan Bank Luxembourg S.A.

Base currency: EUR

Financial year end of this Fund: 30 June

Dealing frequency: Every Hong Kong Business Day

Minimum Investment: USD 1,000 [initial] and USD 500 [subsequent purchases] or equivalent

Ongoing charges over a year#:

Class A (acc) EUR: 1.84%

Class A (acc) USD: 1.85%

Class A (acc) USD-H1: 1.82%

Class B (acc) USD: 3.15%

Class N (acc) USD: 2.60%

#The ongoing charges figures are based on the semi-annual financial statements for the period ended 31 December 2018. These figures may vary from year to year.

Dividend policy: Dividends, if declared, will be reinvested unless indicated by you in the application form to be paid out. Subject to any legal and regulatory requirements, the Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. The Fund may amend such distribution policy subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.

What is this product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").

Investment Objective and Policy

Franklin Mutual European Fund (the "Fund") aims to increase the value of its investments and, secondarily, to earn income over the medium to long term.

The Fund invests principally (that is, at least two-thirds of the Fund's net assets) in:

- equity securities and debt securities convertible or expected to be convertible into common or preferred stock of companies incorporated or having their principal activities in European countries that the investment manager believes are available at prices less than their actual value based on certain recognised or objective criteria (intrinsic value) including common stocks, preferred stocks and convertible securities

In exceptional market circumstances (such as extreme volatility) and on a temporary basis only, 100% of the Fund's net assets may be invested in liquid assets, with due regard to the principle of risk spreading.

The Fund can invest on an ancillary basis in:

- *securities issued by companies involved in mergers, consolidations, liquidations or other major corporate transactions*
- *debt securities of any quality (including lower quality such as non-investment grade securities) of companies involved in reorganization or financial restructuring*
- *securities of non-European issuers (up to 10% of net assets)*
- *derivatives for hedging, efficient portfolio management and/or investment purposes*

Although the Fund generally invests in at least five countries, it may invest in as few as one or two. The Fund currently intends to invest principally in securities of issuers in western Europe. The investment team uses in-depth, fundamental research and analysis to find and purchase those equity and debt securities that are believed to be trading at a discount.

The Fund does not intend to invest extensively or primarily in financial derivative instruments for investment purposes.

For the purpose of generating additional capital or income or for reducing costs or risks, the Fund may engage in securities lending transactions for up to 50% of its net assets, in a manner that is consistent with its investment policy. For the avoidance of doubt, any securities lending will be an ancillary activity of the Fund only.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Market risk:** *The market values of securities owned by the Fund will tend to go up or down, sometimes rapidly or unpredictably, due to factors affecting individual issuers, particular industries or sectors within securities markets, or because of general market conditions. During a general downturn in the securities markets, multiple asset classes (including different sectors of the same asset class) may decline in value at the same time. Similarly, when markets perform well, there can be no assurance that securities held by the Fund will participate in the advance. Because the securities the Fund holds fluctuate in price in this manner, the Fund's value may go down as well as up and investors may be adversely affected.*
- **Equity risk:** *Equity and equity-linked securities are subject to significant price movements due to various economic, political, market and issuer-specific factors. Such changes may adversely affect the value of equities regardless of issuer-specific performance. Additionally, different industries, financial markets and securities can react differently to these changes. Such fluctuations of the Fund's value are often exacerbated in the short-term. Financial markets trends (including feared or actual failures in the banking system) may also cause large fluctuations in the prices of such securities. As a result, the Fund may be adversely affected.*
- **Preferred securities risk:** *An investment in preferred securities involves additional risks that are not typically associated with an investment in common stocks. Generally, holders of preferred securities have no voting rights with respect to the issuer unless preferred dividends are in arrears. An issuer of preferred securities may redeem the securities prior to a specified date or defer distributions for a stated period, which may negatively impact the return of the security held by the Fund. Preferred securities may be substantially less liquid than common stocks and are subject to greater credit risk than bonds and other debt instruments. The value and performance of the Fund may be adversely affected as a result.*
- **Foreign currency risk:** *The Fund will typically invest to a significant degree in securities that are denominated in currencies other than the base currency of the Fund, exposing its investments to changes in foreign exchange rates and the possibility of exchange control regulations. Changes in currency exchange rates may adversely affect the value of the Fund, and also may affect the income earned by the Fund and gains and losses realized by the Fund. The Fund may seek to hedge currency exposure, which can limit the potential for currency gains. To the extent that the Fund seeks to hedge or protect against currency exchange risk, there is no guarantee that hedging or protection will be achieved, and the value of the Fund may be adversely affected. Furthermore, the total return for a share class that is denominated in a different currency (the "alternative currency") from the base*

currency of the Fund may be affected, either positively or negatively, by changes in the exchange rate between the Fund's base currency and the alternative currency.

- **Europe and Eurozone risk:** The Fund may invest in the Eurozone. Mounting sovereign debt burdens (e.g. any sovereigns within the Eurozone, which default on their debts, may be forced to restructure their debts and faced difficulties in obtaining credit or refinancing) and slowing economic growth among European countries, combined with uncertainties in European financial markets, including feared or actual failures in the banking system and the possible break-up of the Eurozone and Euro currency, may adversely affect interest rates and the prices of securities across Europe and potentially other markets as well. These events may increase volatility, liquidity and currency risks associated with investments in Europe. The aforesaid economic and financial difficulties in Europe may spread across Europe and as a result, a single or several European countries may exit the Eurozone or a sovereign within the Eurozone may default on its debts. In any event of the break-up of the Eurozone or Euro currency, the Fund may be exposed to additional operational or performance risks. While the European governments, the European Central Bank, and other authorities are taking measures (e.g. undertaking economic reforms and imposing austerity measures on citizens) to address the current fiscal conditions, these measures may not have the desired effect and therefore the future stability and growth of Europe is uncertain. The performance and value of the Fund may be adversely affected should there be any adverse credit events (e.g. downgrade of the sovereign credit rating or default or bankruptcy of any Eurozone countries).
- **Russian and Eastern European markets risk:** These markets involve special risks, including political, economic, legal, currency and taxation risks, plus risks related to the safekeeping of securities. The Fund may be adversely affected as a result.
- **Interest rate securities risk:** Interest rates changes tend to be driven by prevailing economic, political and regulatory conditions as well as issuer-specific factors, impacting longer term securities more than short-term securities. A fixed income security's value will generally increase in value when interest rates fall and decrease in value when interest rates rise. Movements in interest rates may therefore adversely affect the valuation of the Fund's fixed income securities (such as bonds) and the Fund's net asset value on a daily basis, in addition to impacting the amount of interest income earned by the Fund. Conditions in the banking sector may also adversely affect interest rates and the prices of fixed income securities.
- **Credit risk:** The Fund is exposed to the credit/default risk of issuers of the debt securities that the Fund may invest in. Changes in the financial condition of an issuer, changes in economic and political conditions in general, or changes in economic and political conditions specific to an issuer, are factors that may have an adverse impact on an issuer's credit quality and security value. Default can occur if an issuer fails to make principal and interest payments when due, which may result in a substantial loss to the Fund. Debt securities are also exposed to the risk of being downgraded, which can adversely affect and/or result in a substantial loss to the Fund.
- **Convertible securities risk:** The Fund may invest in convertible securities which are a hybrid between debt and equity, permitting holders to convert into shares of the issuer at a specified future date. Convertibles are exposed to equity movement and greater volatility than straight bond investments. Investments in convertible securities are subject to the same interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments. The value and performance of the Fund may be adversely affected as a result.
- **Liquidity risk:** The Fund may not be able to easily sell securities due to adverse market conditions or reduced value or creditworthiness of issuers in which it invests. The inability of the Fund to sell securities or positions may also impede the ability of the Fund to meet redemption requests in a timely manner. Certain securities may also be illiquid due to limited trading markets or contractual restrictions on their resale. Reduced liquidity due to these factors may have an adverse impact on the net asset value of the Fund.
- **Valuation risk:** Valuation of the Fund's investments may involve uncertainties and judgmental determinations. Independent pricing information may not always be available. If valuations prove to be incorrect, the investors of the Fund may be adversely affected.
- **Volatility risk:** The debt securities in emerging markets may be subject to higher volatility and lower liquidity compared to

more developed markets. The prices of securities traded in such markets may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the Fund may incur significant trading costs.

- **Regional market risk:** By being concentrated in one region (i.e., Europe), the Fund could suffer greater volatility compared to funds that follow a more diversified policy. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting Europe and the Fund/investors may be adversely impacted.
- **Restructuring companies risk:** Companies involved in reorganization or financial restructuring tend to have a relatively weak financial position. Restructuring could be disruptive to the business and management structure of the companies involved, which may result in substantial losses for the Fund.
- **Low-rated or non-investment grade securities risk:** The Fund may invest in lower rated, unrated or non-investment grade securities (such as lower rated bonds) where the risk of failure to pay interest and/or principal is greater vs. higher rated securities. Lower rated, unrated or non-investment grade securities generally pose greater illiquidity and valuation risks. These risks may result in a substantial loss to the Fund.
- **Defaulted debt securities risk:** The Fund may invest in defaulted debt securities which have stopped payments on interest and/or principal in the belief such securities may resume payments in the future, but payment resumption may not occur and such securities may go down further in value, which may result in a substantial loss to the Fund.
- **Chinese market risk:** The Fund is subject to the risks of the Chinese market and the value of the Fund may be susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting the Chinese market. The value and performance of the Fund may be adversely affected as a result.
- **Derivative instruments risk:** Derivative instruments involve cost, may be volatile, and may involve a leverage effect. A small market movement may give rise to a proportionately larger impact, which may cause substantial loss to the Fund. Other risks include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The Fund may also hold covered short positions through the use of derivative instruments. In adverse situations, the Fund's use of derivative instruments may become ineffective and the Fund may suffer significant losses.
- **Swap agreements risk:** In a standard "swap" transaction, two parties agree to exchange the returns (or differential in rates of return) earned or realized on particular predetermined investments or instruments. Whether the Fund's use of swap agreements will be successful in furthering its investment objective will depend on the ability of the investment manager to correctly predict whether certain types of investments are likely to produce greater returns than other investments. Swap agreements are illiquid and in the event of the default or bankruptcy of a swap agreement counterparty, the Fund may suffer a substantial loss.
- **Counterparty risk:** The Fund may be exposed to the credit/default risks of its counterparties and the Fund/investors may be adversely impacted.
- **Securities lending risk:** Securities lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.
- **Dividend policy risk:** The Fund's dividend policy allows for payment of dividends out of capital or effectively out of capital. Where this is done, it amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- **Class hedging risk:** The hedging strategy for a hedged share class may not work as intended, exposing investors of that share class to currency risk. Additionally, investors of a hedged share class may be exposed to fluctuations in the net asset value per share reflecting the gains/losses on and the associated transaction costs of the financial instruments used for hedging, and such investors may be adversely impacted.

How has the Fund performed?

■ The performance of the Fund in these years was achieved under circumstances that no longer apply. The investment policy was changed in 2015 and 2016.

[^] On 6 February 2015, a sub-fund of Franklin Templeton Investment Funds not authorised by the Securities and Futures Commission merged into Franklin Templeton Investment Funds - Franklin Mutual European Fund.

- *Past performance information is not indicative of future performance. Investors may not get back the full amount invested.*
- *The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividends reinvested.*
- *These figures show by how much class A (acc) EUR increased or decreased in value during the calendar year being shown. Class A (acc) EUR is the share class available in Hong Kong denominated in the base currency of the Fund with the longest history in the Fund. Performance data has been calculated in EUR, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.*
- *Fund launch date: 3 April 2000*
- *Class A (acc) EUR launch date: 31 December 2001*

Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?
Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

	Class A	Class B	Class N
Subscription fee (Initial sales charge)	Up to 5.00% of the subscription amount	N/A	Up to 3.00% of the subscription amount
Switching fee (Switching charge)*	1.00% of the value of the shares being switched	N/A	N/A
Redemption fee (Redemption charge)	N/A	Up to 4.00%	N/A

Ongoing fees payable by the Fund

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the Fund's net asset value)		
	Class A**	Class B***	Class N**
Management fee (Investment management fee)*	1.00%	1.00%	1.00%
Depositary fee	Up to 0.140%	Up to 0.140%	Up to 0.140%
Performance fee	N/A	N/A	N/A
Administration fee	N/A	N/A	N/A
Maintenance charge*	0.50%	0.75%	1.25%
Servicing charge	N/A	1.06%	N/A
Registrar and Transfer, Corporate, Domiciliary and Administrative Agent fee +	Up to 0.2175%	Up to 0.2175%	Up to 0.2175%
Additional fixed amount per Shareholder account at each Class level	Up to USD 30 per annum	Up to USD 30 per annum	Up to USD 30 per annum

*The current fee level may be increased up to the maximum level permitted by the constitutive document of the Fund by giving one month's prior notice to the shareholders.

** The Annual Management Fees as defined in the Explanatory Memorandum comprise of the Management Fee (Investment Management Fee) and the Maintenance Charge.

*** The Annual Management Fees as defined in the Explanatory Memorandum comprise of the Management Fee (Investment Management Fee), the Maintenance Charge and the Servicing Charge.

Other fees

You may have to pay other fees and charges when dealing in the shares of the Fund.

Additional Information

- You generally buy and redeem shares at the Fund's next determined net asset value (NAV) after the Hong Kong Representative, Franklin Templeton Investments (Asia) Limited, receives your request in good order on or before 4:00 p.m. (Hong Kong time) being the dealing cut-off time. Certain intermediaries may impose an earlier dealing cut-off time.

- *The net asset value of this Fund is calculated and the price of shares is published on each business day. Information about prices is available online at www.franklintempleton.com.hk.*
- *The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are made available by the Hong Kong Representative on request and are also available online at www.franklintempleton.com.hk.*
- *Investors may obtain the past performance information of other share classes offered to Hong Kong investors from the Hong Kong Representative's website at www.franklintempleton.com.hk.*
- *Investors may obtain information on the intermediaries by calling the Hong Kong Representative at (852)2877-7733 or visiting the Hong Kong Representative's website at www.franklintempleton.com.hk.*
- *The website mentioned above has not been reviewed by the Securities and Futures Commission ("SFC").*
