Risk Considerations

- Franklin Mutual European Fund invests principally in equity securities and debt securities convertible or expected to be convertible into common or preferred stock of companies incorporated or having their principal activities in European countries.
- The Fund is subject to debt securities risk, market risk, equity risk, preferred securities risk, foreign currency risk, Europe and Eurozone risk, credit risk, convertible securities risk, concentration risk, swap agreements risk, counterparty risk, securities lending risk and class hedging risk.
- Security lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investment involves risks which may result in loss of part or entire amount of your investment. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you. Investors should not only base on this marketing material alone to make investment decisions.
