

Schroders

Schroder International Selection Fund Taiwanese Equity

A Accumulation USD | Data as at 31.01.2020

Important Information

The fund invests in equity and equity related securities of Taiwanese companies.

•The fund may invest in emerging markets and concentrated region and subject to political and economic, legal and regulatory, market and settlement, execution and counterparty, currency and concentration risks.

•The fund may use derivatives to meet its investment objective but does not intend to use derivatives extensively for investment purposes. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.

•For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Investment Objectives

The fund aims to provide capital growth by investing in equity and equity related securities of Taiwanese companies.

Schroders

Schroder International Selection Fund Taiwanese Equity

A Accumulation USD | Data as at 31.01.2020

Return of USD 10,000

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated NAV to NAV (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.
