The Policy Owner may request the period of annuity payments⁵ while subject to the approval of BOC Life.

Investment Strategy, Philosophy in Deciding Dividends and Fulfilment Ratio of Dividends:

BOC Life invests globally in various types of assets, in order to achieve the advantages of diversification in investment portfolio. The assets supporting the policies under the Plan mainly consist of the following:

	Mix
Fixed income instruments or interest-bearing securities	35% - 55%
Growth assets	45% - 65%

Fixed income instruments or interest-bearing securities include but not limited to government and corporate bonds, etc.

- BOC Life primarily invests in investment-grade bonds, together with a small portion of high-yield bonds and emerging-market bonds to further improve yield.
- Under normal circumstances, the major markets invested by BOC Life are North America, the Chinese mainland, Hong Kong China and other Asian developed countries.

Growth assets include but not limited to listed equity, private equity, mutual funds, properties investment, etc. BOC Life invests in diversified growth assets, which aims to achieve a higher long term return over fixed income investments.

With the aim of achieving our long term investment target, BOC Life, at our sole discretion, reserves the right to adjust the aforementioned asset allocation when there are material changes in market outlook and condition, or engage in other financial arrangements including but not limited to reinsurance arrangement. BOC Life aims at investing in assets denominated in policy's currency. If the currency by which the assets are denominated is not the same as policy currency, BOC Life may use derivatives to manage the impact of currency risk.

For the latest Investment Strategy, please refer to BOC Life website www.bocliffe.com.hk.

Philosophy in Deciding Dividends:

Participating insurance plans provide policy owners an opportunity to receive a share of profits attributable to the participating life insurance business of BOC Life by means of

dividends, with the potential prospect of long-term rates of return. To accomplish the purpose, we invest in a wide range of asset portfolios that are prudently chosen by BOC Life to balance the risk. In general, the asset portfolios mainly consist of fixed income securities and equity investments.

The actual amount of dividends is determined by the stipulated surplus sharing approach in BOC Life's policy, which is based on the past experience of BOC Life and the long-term expectation of the participating life insurance business in the future. Dividends amount mainly depends on the overall performance of the participating life insurance business of BOC Life, taking into account factors including investment returns, claim experience, persistency and operating expense. The actual amount of dividends payable is recommended by our Appointed Actuary according to the aforementioned company's policy and approved by the Board of Directors of BOC Life.

Annual dividends paid can be left with BOC Life and accumulate with interest. The interest rate (Dividends Accumulation Rate) is determined based on market conditions and expected investment return of BOC Life.

In light of the above factors, dividends and Dividend Accumulation Rate are not guaranteed and may be higher or lower than the values illustrated in the benefit illustration provided at point of sale.

You may browse the following website, www.bocliffe.com.hk/ps, to understand BOC Life's philosophy in deciding dividends as well as dividend history for reference purposes. Please note that past performance of dividend is not an indicator for its future performance.

Risk Disclosure of RMB and USD Insurance:

RMB and USD policies are subject to exchange rate risk. The exchange rate between RMB and HKD or USD and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (where applicable), account value / surrender value and other benefits payable under RMB or USD policy will vary with the exchange rate. The exchange rate between RMB and HKD or USD and HKD will be the market-based prevailing exchange rate determined by BOC Life from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer chooses to pay premiums in HKD, or requests the insurer to pay the account value / surrender value or other benefits payable in HKD, for RMB or USD policy. **RMB Conversion Limitation Risk** - RMB Insurance are subject to exchange rate fluctuations which may provide

both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies. (Only applicable to Individual Customers) RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance. (Only applicable to Corporate Customers) RMB is currently not fully freely convertible. Corporate customers that intend to conduct conversion of RMB through banks may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

And the Premium Deposit Account balance of supplementary benefits (if any) is accumulated at a special accumulation interest rate determined by BOC Life from time to time. The accumulation interest rates of the prepaid premium for HKD, RMB and USD policies may not be the same. Since the special accumulation interest rate of the Premium Deposit Account of supplementary benefits and premiums for some supplementary benefits (if applicable) are not guaranteed and may be changed from time to time by BOC Life, the Premium Deposit Account balance (if any) is not guaranteed to be sufficient to cover all premiums for the whole premium payment term.
