**Notes:** The Policy Owner is subject to the credit risk of BOC Life. If the Policy Owner discontinues and / or surrenders the insurance plan in the early policy years, the amount of the benefit he / she will get back may be considerably less than the amount of the premium he / she has paid. Past, current, projected and / or potential benefits and / or returns (e.g. interests) presented herein are not guaranteed and are for illustrative purposes only. The actual future amounts of benefits and / or returns may be lower than or higher than the currently quoted benefits and / or returns.

### Investment Strategy, Philosophy in Deciding Interest Rate for Accumulation:

The assets supporting the policies under the Plan mainly consist of fixed income instruments or interest-bearing securities (including but not limited to government and corporate bonds, etc.).

- BOC Life primarily invests in investment-grade bonds, together with a small portion of high-yield bonds and emerging-market bonds to further improve yield.
- Under normal circumstances, the major markets invested by BOC Life are North America, the Chinese mainland, Hong Kong China and other Asian developed countries.

With the aim of achieving our long term investment target, BOC Life, at our sole discretion, reserves the right to adjust the aforementioned asset allocation when there are material changes in market outlook and condition, or engage in other financial arrangements including but not limited to reinsurance arrangement. BOC Life aims at investing in assets denominated in policy's currency. If the currency by which the assets are denominated is not the same as policy currency, BOC Life may use derivatives to manage the impact of currency risk.

The Interest Rate for Accumulation is determined based on market conditions and expected investment return of BOC Life.

In light of the above factors, Interest Rate for Accumulation is not guaranteed and may be higher or lower than the values illustrated in the benefit illustration provided at point of sale.

### Risk Disclosure of RMB and USD Insurance:

RMB and USD policies are subject to exchange rate risk. The exchange rate between RMB and HKD or USD and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (if applicable), account value / surrender value and other benefits payable under RMB or USD policy will vary with the exchange rate. The exchange rate between RMB and HKD or USD and HKD will be the market-based prevailing exchange rate determined by BOC Life from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer

chooses to pay premiums in HKD, or requests the insurer to pay the account value / surrender value or other benefits payable in HKD, for RMB or USD policy. **RMB Conversion Limitation Risk** - RMB Insurance are subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies. RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

#### **Credit Risk:**

Insurance contract is signed between customers and BOC Group Life Assurance Co. Ltd ("BOC Life"). Therefore, customers are subject to the credit risk of BOC Life. Premiums paid by Policy Owner will become part of BOC Life. If BOC Life becomes insolvent or goes into liquidation or defaults on its obligations, customers may result in substantial losses.

#### **Market and Interest Rate Risk:**

The Plan is a life insurance product. Changes in market and interest rate risk borne by insurance company which will not affect the guaranteed return of the policy. But the accumulated annual interest rate is not guaranteed and may be adjusted by insurer during version update. The policy of non-guaranteed accumulated annual interest rate may be affected by the market and interest rate risk.

#### **Affordability and Liquidity Risk:**

With customer's income and / or disposable net liquid assets, customer should ensure that he / she is able to afford the premium payable and applicable levies during the entire period of the insurance plan. If the customer wants to apply for the Plan after considered his / her need on liquid funds, the customer is expected to keep the policy for the entire policy term. If the customer decides to make fully or partially surrender before policy maturity, or does not keep up premium payments, the customer may receive an amount less than the premiums paid and suffer from a significant loss.

If the above circumstances do not align with customer's expectation, the Plan may not fulfill customer's insurance needs and the customer should explore other insurance plan(s) which is/are suitable for him / her.

#### **Return Risk:**

The major benefits shown on illustration summary is based on the assumptions that during the policy term (i) all premiums are paid in full when due; (ii) Guaranteed Monthly Annuity Income is withdrawn in full regularly on each Monthiversary during the Annuity Income Period and (iii) the Insured is covered by only one BOC Life Deferred Annuity (Fixed Term) policy. Accumulation Rate are not guaranteed and will be adjusted from time to time. The expected investment return of insurer can go up as well as down. Insurance company's present and past performance does not represent future performance.

#### **Cooling-off period:**

Policy Owner has the right to cancel the policy and obtain a refund of any premium(s) and the levy and / or charges (if any) paid, which are collected by BOC Life on behalf of the government or the regulatory authority (including but not limited

to the Insurance Authority) according to the relevant requirements, less any difference caused by exchange rate fluctuation, where applicable, by giving written notice. Such notice must be signed by the Policy Owner and received directly by BOC Life's Principal Office at 13/F, 1111 King's Road, Taikoo Shing, Hong Kong within 21 calendar days after the delivery of the policy or issue of a Notice to the Policy Owner or the representative of the Policy Owner, whichever is the earlier. The Policy Owner understands that BOC Life will notify the Policy Owner of the Cooling-off Period via a Notice and / or text message. If the last day of the Cooling-off Period as indicated in the Notice and/or the text message is not a working day, it will fall on the next working day. No refund can be made if a claim has been admitted.

### **Premium Overdue Risk:**

The Policy Owner should pay premium on time during the premium payment term. It may result in lapse or termination of the policy if the required amount (such as premium) is not made before expiry of the grace period (if applicable) as prescribed by BOC Life. Nevertheless, it is subject to non-forfeiture provisions (if applicable). If the policy is terminated or lapsed due to non-payment of premium, the surrender value received by the Policy Owner may be less than the total premiums paid and the Policy Owner will lose the insurance protection provided by the policy.

### **Policy Termination Risk:**

BOC Life may terminate the policy before the maturity date if any one of the following events occurs:

- (i) the death of the Insured; or
- (ii) BOC Life approves the Policy Owner's written request for surrender; or
- (iii) the policy lapses after the end of the grace period.

### **Inflation Risk:**

The actual rate of inflation may be higher than expected, therefore the amount you receive may be less in real terms.

### **Taxation Risk:**

There might not be tax deduction benefits for retired Policy Owners who are not subject to salaries tax or tax under personal assessment.
