Notes: The Policy Owner is subject to the credit risk of BOC Life. If the Policy Owner discontinues and / or surrenders the above-mentioned plan(s) in the early policy years, the amount of the benefit he / she will get back may be considerably less than the amount of the premium he / she has paid. Past, current, projected and / or potential benefits and / or returns (e.g. bonuses, dividends, interests) presented herein are not guaranteed and are for illustrative purposes only. The actual future amounts of benefits and / or returns may be lower than or higher than the currently quoted benefits and / or returns.

RMB Conversion Limitation Risk:

(Only applicable to Individual Customers) RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance. (Only applicable to Corporate Customers) RMB is currently not fully freely convertible. Corporate customers that intend to conduct conversion of RMB through banks may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

Exchange Rate and Currency Risk of RMB / Foreign currency:

RMB / Foreign currency exchange rates may fluctuate. As a result, you may incur a substantial loss when you choose to convert your payout benefits to other currencies. The subsequent premium payments (if any) may be higher than your initial premium payment as a result of exchange rate fluctuations. Additionally, the conversion of your benefits to other currencies is subject to currency exchange restrictions applicable at the time when the benefits are paid. If your policy currency is not your local currency, your policy value may appreciate or depreciate when viewed against your local currency.

RMB / Foreign currency policies are subject to exchange rate risk. We may illustrate a different future policy value for policies denominated in different currencies, with the expected foreign exchange movements reflected. The exchange rate between RMB / foreign currency and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (where applicable), account value / surrender value (where applicable) and other benefits payable under RMB / foreign currency policy will vary with the exchange rate. The exchange rate between RMB / foreign currency and HKD will be the market-based prevailing exchange rate determined by BOC Life from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer chooses to pay premiums in HKD, or requests the insurer to pay the account value/ surrender value (where applicable) or other benefits payable in HKD, for RMB / foreign currency policy.

Other Key Risks:

- The Policy Owner should pay premium on time during the premium payment term. It may result in lapse or termination of the policy if the required amount (such as premium) is not made before expiry of the grace period (if applicable) as prescribed by BOC Life. Nevertheless, it is subject to the automatic premium loan (if applicable) (BOC Life will advance the premium due from the non-forfeiture value as an automatic premium loan) and non-forfeiture provisions (if applicable). If the policy is terminated or lapsed due to non-payment of premium, the surrender value received by the Policy Owner may be less than the total premiums paid and the Policy Owner will lose the insurance protection provided by the policy.
- BOC Life may terminate the policy if any one of the following events occurs:
 - (i) the death of the Insured; or
 - (ii) BOC Life approves the Policy Owner's written request for surrender; or
 - (iii) the policy lapses after the end of the grace period; or
 - (iv) the non-forfeiture value is less than zero (if applicable); or
 - (v) the aggregate amount paid or payable by BOC Life has reached the maximum benefit amount of all coverage of the policy (if applicable); or
 - (vi) BOC Life's payment of Terminal Illness Benefit (if applicable).
- The actual rate of inflation may be higher than expected, therefore the amount you receive may be less in real terms.
- The policy may lapse when the account value falls to zero or negative (if applicable).

Credit Risk:

Insurance contract is signed between customers and BOC Life. Therefore, customers are subject to the credit risk of BOC Life. Premiums paid by Policy Owner will become part of BOC Life. If BOC Life becomes insolvent or goes into liquidation or defaults on its obligations, customers may result in substantial losses.

Premium Overdue Risk:

The Policy Owner should pay premium on time during the premium payment term. It may result in lapse or termination of the policy if the required amount (such as premium) is not made before expiry of the grace period (if applicable) as prescribed by BOC Life. Nevertheless, it is subject to the automatic premium loan (if applicable) (BOC Life will advance the premium due from the non-forfeiture value as an automatic premium loan) and non-forfeiture provisions (if applicable). If the policy is terminated or lapsed due to non-payment of premium, the surrender value received by the Policy Owner may be less than the total premiums paid and the Policy Owner will lose the insurance protection provided by the policy.

Inflation Risk:

The actual rate of inflation may be higher than expected, therefore the amount you receive may be less in real terms.

Taxation Risk (if applicable):

There might not be tax deduction benefits for retired Policy Owners who are not subject to salaries tax or tax under personal assessment.
