Investment Strategy, Philosophy in Deciding Dividends and Fulfillment Ratio:

BOC Life invests globally in various types of assets, in order to achieve the advantages of diversification in investment portfolio. The assets supporting the policies under the Plan mainly consist of the following:

	Mix
Fixed income instruments or interest-bearing securities	60% - 80%
Growth assets	20% - 40%

Fixed income instruments or interest-bearing securities include but not limited to government and corporate bonds, etc.

- BOC Life primarily invests in investment-grade bonds, together with a small portion of high-yield bonds and emerging-market bonds to further improve yield.
- Under normal circumstances, the major markets invested by BOC Life are North America, the Chinese mainland, Hong Kong and other Asian developed countries.

Growth assets include but not limited to listed equity, private equity, mutual funds, properties investment, etc. BOC Life invests in diversified growth assets, which aims to achieve a higher long term return over fixed income investments.

With the aim of achieving our long term investment target, BOC Life, at our sole discretion, reserves the right to adjust the aforementioned asset allocation when there are material changes in market outlook and condition, or engage in other financial arrangements including but not limited to reinsurance arrangement. BOC Life aims at investing in assets denominated in policy's currency. If the currency by which the assets are denominated is not the same as policy currency, BOC Life may use derivatives to manage the impact of currency risk.

For the latest Investment Strategy, please refer to BOC Life website www.boclife.com.hk.

The aforementioned Investment Strategy, Philosophy in Deciding Dividends and Fulfillment Ratio are applicable to Dividends and Terminal Dividend of this Plan.

Philosophy in Deciding Dividends:

Participating insurance plans provide Policy Owners an opportunity to receive a share of profits attributable to the participating life insurance business of BOC Life by means of dividends, with the potential prospect of long-term rates of return. To accomplish the purpose, we invest in a wide range of asset portfolios that are prudently chosen by BOC Life to balance the risk. In general, the asset portfolios mainly consist of fixed income securities and equity investments.

The actual amount of dividends is determined by the stipulated surplus sharing approach in BOC Life’s policy, which is based on the past experience of BOC Life and the long-term expectation of the participating life insurance business in the future. Dividends amount mainly depends on the overall performance of the participating life insurance business of BOC Life, taking into account factors including investment returns, claim experience, persistency and operating expense. The

actual amount of dividends payable is recommended by our Appointed Actuary according to the aforementioned company's policy and approved by the Board of Directors of BOC Life.

Dividends paid can be left with BOC Life and accumulate with interest. The interest rate (Dividends Accumulation Rate) is determined based on market conditions and expected investment return of BOC Life.

In light of the above factors, dividends and Dividend Accumulation Rate are not guaranteed and may be higher or lower than the values illustrated in the proposal summary provided at point of sale.

You may browse the following website, www.boclif.com.hk/ps, to understand BOC Life's philosophy in deciding dividends as well as dividend history for reference purposes. Please note that past performance of dividend is not an indicator for its future performance.

Risk Disclosure of RMB and USD Insurance:

RMB and USD policies are subject to exchange rate risk. The exchange rate between RMB and HKD or USD and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (if applicable), account value / surrender value and other benefits payable under RMB or USD policy will vary with the exchange rate. The exchange rate between RMB and HKD or USD and HKD will be the market-based prevailing exchange rate determined by BOC Life from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer chooses to pay premiums in HKD, or requests the insurer to pay the account value / surrender value or other benefits payable in HKD, for RMB or USD policy. **RMB Conversion Limitation Risk** - RMB Insurance is subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies. RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

Credit Risk:

Insurance contract is signed between customers and BOC Life. Therefore, customers are subject to the credit risk of BOC Life. Premiums paid by Policy Owner will become part of BOC Life. If BOC Life becomes insolvent or goes into liquidation or defaults on its obligations, customers may result in substantial losses.

Market and Interest Rate Risk:

The Plan is a life insurance product. Changes in market and interest rate risk borne by insurance company which will not affect the guaranteed return of the policy. But the accumulated annual interest rate is not guaranteed and may be adjusted by insurer during version update. The policy of non-guaranteed accumulated annual interest rate may be affected by the market and interest rate risk.

Affordability and Liquidity Risk:

With customer's income and / or disposable net liquid assets, customer should ensure that he / she is able to afford the premium payable and applicable levies during the entire period of the insurance plan. If the customer wants to apply for the Plan after considering his / her need on liquid funds, the customer is expected to keep the policy for the entire policy term. If the customer decides to make fully or partially surrender before policy maturity, or does not keep up premium payments, the customer may receive an amount less than the premiums paid and suffer from a significant loss. If the above circumstances do not align with customer's expectation, the Plan may not fulfill customer's insurance needs and the customer should explore other insurance plan(s) which is / are suitable for him / her.

Return Risk:

The major benefits shown on illustration summary is based on the assumptions that during the policy term (i) all premiums are paid in full when due; (ii) Guaranteed Monthly Annuity Income is withdrawn in full regularly on each Monthiversary during the Annuity Income Period and (iii) the insured is covered by only one BOC Life Deferred Annuity (Lifetime) policy. Monthly Dividend, Terminal Dividend and Accumulation Rate are not guaranteed and will be adjusted from time to time. The expected investment return of insurer can go up as well as down. Insurance company's present and past performance does not represent future performance.

Premium Overdue Risk:

The Policy Owner should pay premium on time during the premium payment term. It may result in lapse or termination of the policy if the required amount (such as premium) is not made before expiry of the grace period (if applicable) as prescribed by BOC Life. Nevertheless, it is subject to the automatic premium loan (if applicable) (BOC Life will advance the premium due from the non-forfeiture value as an automatic premium loan²) and non-forfeiture provisions (if applicable). If the policy is terminated or lapsed due to non-payment of premium, the surrender value received by the Policy Owner may be less than the total premiums paid and the Policy Owner will lose the insurance protection provided by the policy.

Policy Termination Risk:

BOC Life may terminate the policy before the maturity date if any one of the following events occurs:

- (i) the death of the Insured; or
- (ii) BOC Life approves the Policy Owner's written request for surrender; or
- (iii) the policy lapses after the end of the grace period; or
- (iv) the non-forfeiture value is less than zero (if applicable).

Inflation Risk:

The actual rate of inflation may be higher than expected, therefore the amount you receive may be less in real terms.

Early Surrender Risk:

The Plan is designed to be held for a long term period. Early surrender, partial withdrawal, reduction or suspension of premium may result in a significant loss of principal.

Taxation Risk:

There might not be tax deduction benefits for retired Policy Owners who are not subject to salaries tax or tax under personal assessment.

Certification by the Insurance Authority:

The mere fact that the Plan has been certified by IA does not mean that the premiums paid for policies under the Plan are eligible for tax deductions. Certification by IA is only an indication that the product complies with the criteria set out by IA. IA's certification is not a recommendation or endorsement of the Plan nor does it guarantee the commercial merits of the Plan or its performance. 3. If the Policy Owner chooses to withdraw the accumulated Guaranteed Monthly Annuity Income and/ or interest accrued thereon (if any) and / or Non-guaranteed Monthly Annuity Income (Monthly Dividends) (if any) and / or interest accumulated (if any), the accumulated Guaranteed Monthly Annuity Income and / or interest accrued thereon (if any) and / or Non-guaranteed Monthly Annuity Income (Monthly Dividends) (if any) and / or interest accumulated (if any) withdrawn will no longer be accumulated as part of the total cash value and the total Death Benefit of the policy. The total cash value, the surrender value and the total Death Benefit of the policy will be reduced accordingly. 4. The Plan is a participating policy. Its Non-guaranteed Monthly Annuity Income (Monthly Dividends) (if any) and the annual interest rate for the accumulation of Guaranteed Monthly Annuity Income and dividend accumulation, and Terminal Dividend (if any) are not guaranteed and may be changed from time to time. Past performance is not indicative of future performance. The actual amount received may be higher or lower than the estimated amount. BOC Life reserves the right to change them from time to time. Guaranteed Monthly Annuity Income, Non-guaranteed Monthly Annuity Income (Monthly Dividends) (if any) and interest accrued thereon shall be first applied to offset any indebtedness. 5. "Total Premiums Paid" means the total premiums paid for the basic plan. Any Premium Deposit Account balance or rider premiums (if applicable) shall be excluded. Premium discount (if any) will not be taken into account when calculating the Death Benefit. Indebtedness shall include but not limited to any policy loan that has been taken by the Policy Owner and its interest (if any). Whilst the policy is in force, the Policy Owner can apply for a policy loan against Guaranteed Cash Value of the policy provided that no loan may be applied for after the commencement of the Annuity Income Period and subject to the policy loan provision. Upon the termination of policy, if the policy loan and its interest (if any) have not been settled in full, they will be deducted from the total cash value thereupon. Once the Policy Owner is unable to repay the policy loan and interest, where the total amount of indebtedness is equal to or higher

than Guaranteed Cash Value, the policy will lapse, and the life protection and supplementary riders (if any) will be terminated without providing any surrender value, and the Policy Owner may sustain a substantial loss. For details, please refer to the policy provisions issued by BOC Life.

6. Bank account includes Bank of China (Hong Kong) Limited ("BOCHK") account.

8. Premium Deposit Account is only applicable to policy with premium payment term of 5 years and annual payment mode. If premium prepayment option is selected, premiums and levy payable for 5 policy years have to be fully paid upon insurance application whereas further prepayment will not be accepted thereafter. If "Waiver Of Premium Rider" is attached to the policy, Premium Deposit Account is not applicable. Annual premiums and the corresponding levy will be deducted automatically from the Premium Deposit Account on each Policy Anniversary during the premium payment term when due. The Premium Deposit Account balance (if any) should be sufficient to pay the entire amount of annual premiums and levy of the policy, and cannot be used for partial settlement of annual premiums and levy. The Premium Deposit Account balance (if any) is accumulated with BOC Life at a non-guaranteed special accumulation interest rate. Interest on the Premium Deposit Account shall accrue on a daily basis and compound on each Policy Anniversary. Special accumulation interest rates of the prepaid premium for HKD / USD / RMB policies are not the same. Since BOC Life may change the special accumulation interest rate and the premiums for some supplementary riders (if applicable) from time to time, the Premium Deposit Account balance (if any) is not guaranteed to be sufficient to cover all premiums and levy for the whole premium payment term. When the balance of the Premium Deposit Account (if any) is insufficient to pay the annual premium and levy payable, BOC Life will issue a premium notice to customer, and interest will not be accrued on the residual value. If withdrawal is made from the Premium Deposit Account or the policy is surrendered, the withdrawn amount (if any) will be provided to the Policy Owner without charges. If the Insured passes away, the Premium Deposit Account balance (if any) together with the Death Benefit will be payable to the policy beneficiary. The annualized total internal rate of return is calculated based on the Projected Monthly Annuity Income payable and the Guaranteed Cash Value plus the Terminal Dividend (if any) upon the death of the Insured, and assuming that (i) you choose to cash out all the Projected

Monthly Annuity Income monthly on time when they are payable at each Monthiversary during the Annuity Income Period, (ii) levy, premium discount (if any) and prepayment (if any) are not included, (iii) all premiums are paid in full when due, and (iv) Annuity Income Period of 30 years is adopted in the calculation. Projected Monthly Annuity Income includes Guaranteed Monthly Annuity Income and Non-guaranteed Monthly Annuity Income (Monthly Dividends) (if any). The annualized total internal rate of return is not guaranteed. If the Insured dies before the age of 90, the actual annualized guaranteed internal rate of return and annualized total internal rate of return will be lower than expected. These percentages are rounded to 2 decimal places, and depend on Insured's age, your chosen policy currency, premium payment term and premium payment mode.

Levy Collection Arrangement:
