Investment Strategy, Philosophy in Deciding Dividends and Fulfillment Ratio:

BOC Life invests globally in various types of assets, in order to achieve the advantages of diversification in investment portfolio. The assets supporting the policies under the Plan mainly consist of the following:

	Mix
Fixed income instruments or interest-bearing securities	75% - 95%
Growth assets	5% - 25%

Fixed income instruments or interest-bearing securities include but not limited to government and corporate bonds, etc.

- BOC Life primarily invests in investment-grade bonds, together with a small portion of high-yield bonds and emerging-market bonds to further improve yield.
- Under normal circumstances, the major markets invested by BOC Life are North America, the Chinese mainland, Hong Kong China and other Asian developed countries.

Growth assets include but not limited to listed equity, private equity, mutual funds, properties investment, etc. BOC Life invests in diversified growth assets, which aims to achieve a higher long term return over fixed income investments.

With the aim of achieving our long term investment target, BOC Life, at our sole discretion, reserves the right to adjust the aforementioned asset allocation when there are material changes in market outlook and condition, or engage in other financial arrangements including but not limited to reinsurance arrangement. BOC Life aims at investing in assets denominated in policy's currency. If the currency by which the assets are denominated is not the same as policy currency, BOC Life may use derivatives to manage the impact of currency risk.

For the latest Investment Strategy, please refer to BOC Life website www.boclife.com.hk.

Philosophy in Deciding Dividends:

Participating insurance plans provide policy owners an opportunity to receive a share of profits attributable to the participating life insurance business of BOC Life by means of dividends, with the potential prospect of long-term rates of return. To accomplish the purpose, we invest in a wide range of asset portfolios that are prudently chosen by BOC Life to balance the risk. In general, the asset portfolios mainly consist of fixed income securities and equity investments.

The actual amount of dividends is determined by the stipulated surplus sharing approach in BOC Life's policy, which is based on the past experience of BOC Life and the long-term expectation of the participating life insurance business in the future. Dividends amount mainly depends on the overall performance of the participating life insurance business of BOC Life, taking into account factors including investment returns, claim experience, persistency and operating expense. The actual amount of dividends payable is recommended by our Appointed Actuary according to the aforementioned company's policy and approved by the Board of Directors of BOC Life.

Dividends paid can be left with BOC Life and accumulate with interest. The interest rate (Dividends Accumulation Rate) is determined based on market conditions and expected investment return of BOC Life.

In light of the above factors, dividends and Dividend Accumulation Rate are not guaranteed and may be higher or lower than the values illustrated in the benefit illustration provided at point of sale.

You may browse the following website, www.boclife.com.hk/ps, to understand the BOC Life's philosophy in deciding dividends as well as dividend history for reference purposes. Please note that past performance of dividend is not an indicator for its future performance.

Risk Disclosure of RMB and USD Insurance:

RMB and USD policies are subject to exchange rate risk. The exchange rate between RMB and HKD or USD and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (if applicable), account value / surrender value and other benefits payable under RMB or USD policy will vary with the exchange rate. The exchange rate between RMB and HKD or USD and HKD will be the market-based prevailing exchange rate determined by BOC Life from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer chooses to pay premiums in HKD, or requests the insurer to pay the account value / surrender value or other benefits payable in HKD, for RMB or USD policy.

RMB Conversion Limitation Risk - RMB Insurance is subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies. (Only applicable to Individual Customers) RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial

decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance. (Only applicable to Corporate Customers) RMB is currently not fully freely convertible. Corporate customers that intend to conduct conversion of RMB through banks may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

Other Key Risks:

- The Policy Owner should pay premium on time during the premium payment term. It may result in lapse or termination of the policy if the required amount (such as premium) is not made before expiry of the grace period (if applicable) as prescribed by BOC Life. If the policy is terminated or lapsed due to non-payment of premium, the surrender value received by the Policy Owner may be less than the total premiums paid and the Policy Owner will lose the insurance protection provided by the policy.
- BOC Life may terminate the policy before the maturity date if any one of the following events occurs:
 - (i) the death of the Insured (or after the last annuity payment is paid once the Survivorship Option is exercised under the policy) ; or
 - (ii) BOC Life approves the Policy Owner's written request for surrender; or
 - (iii) the aggregate amount paid or payable by BOC Life has reached the maximum benefit amount of all coverage of the policy (if applicable).
- The actual rate of inflation may be higher than expected, therefore the amount you receive may be less in real terms.

Remarks:

1. The Plan is a participating policy. Nevertheless, Monthly Dividend and the accumulation interest rate for accumulated Guaranteed Monthly Income, accumulated Guaranteed Monthly Bonus and accumulated Monthly Dividend (if any) are not guaranteed and may be changed from time to time.  - (ii) 3 months of Guaranteed Monthly Bonus calculated according to:
 - (a) The amount of Guaranteed Monthly Bonus payable at the time when the Event occurs if the Event occurs on or before the 60th Monthiversary; or
 - (b) The amount of the final Guaranteed Monthly Bonus if the Event occurs after the 60th Monthiversary.

The Beneficiary, at all times, does not have the right to change the Survivorship Option or any part thereof, including but not limited to the payment method once approved by BOC Life. For the avoidance of doubt, the claims for Death Benefit and Survivorship Option are mutually exclusive.
